

RAVULA AJAY

📍 Warangal, Telangana | 📞 +91-6309680667 | ✉️ ravulaajay9@gmail.com
🌐 linkedin.com/in/ravula-ajay-42612a288 | 🐙 github.com/RAVULAAJAY

Career Objective

Computer Science Engineering (AI & ML) student with hands-on experience in full-stack development, AI prompt engineering, and model evaluation. Strong foundation in data structures, algorithms, and software engineering, complemented by practical experience in building end-to-end applications such as FarmDirect. Skilled in problem-solving and developing scalable, user-centric solutions, with a strong interest in leveraging technology and artificial intelligence to address real-world challenges and create meaningful impact.

Education

SR University, Warangal	2023 – 2027
B.Tech, Computer Science and Engineering (AI & ML)	
Alphores Junior College	2021 – 2023
Intermediate (MPC)	
Abhyas High School	2021
Secondary School Certificate (SSC)	

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO
Databases: MongoDB, MySQL, Firebase Firestore
Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Git, GitHub, Vercel, Render
AI/ML & Data: Machine Learning fundamentals, Generative AI / LLM APIs (OpenAI), OpenCV, Pandas, NumPy
Tools: VS Code, Postman, NetBeans, Tkinter

Projects

Farm Direct – Direct-to-Buyer Farmer E-Marketplace 2026

React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Firebase Firestore, Socket.IO, JWT

- Architected and built a full-stack farmer-to-consumer marketplace covering product listings, inventory tracking, and end-to-end order processing.
- Implemented secure authentication with JWT, OTP-based verification, password recovery, and role-based access control for buyers and farmers.
- Built real-time chat, order tracking, and notifications using Socket.IO to keep both parties in sync during a transaction.
- Designed REST APIs integrated with Firebase Firestore and Storage to manage users, products, orders, and reviews.
- Deployed a responsive, mobile-first UI to production using Vercel and Render, with transactional email via Brevo.

Face Recognition Attendance System 2026

Python, OpenCV, Tkinter, MySQL, NumPy

- Built a desktop attendance system using Haar Cascade for face detection and LBPH for recognition, with a Tkinter GUI for registration, dataset training, and attendance monitoring.
- Integrated a MySQL backend to store student profiles and attendance logs, with search by student ID, department, and semester.

Digital Farm Management Portal 2026

- Built a full-stack livestock management system enabling farmers, veterinarians, laboratories, and regulators to manage animal health records, treatment tracking, compliance monitoring, and operational reporting.

Internships

Edunet Foundation (AICTE & Shell India) Oct – Nov 2025

- Cleaned and analyzed structured datasets using Pandas and NumPy to support machine learning workflows.
- Built data visualizations to help summarize trends for project reporting, with attention to ethical data handling practices.

Generative AI Virtual Internship Jan – Mar 2025

- Built prototype applications using OpenAI APIs to explore LLM-based automation and decision-support use cases.
- Experimented with transformer-based models to understand prompt design and pipeline integration.

AWS Cloud Virtual Internship (EduSkills + AICTE) Oct – Dec 2024

- Practiced deploying and configuring cloud infrastructure using core AWS services, including IAM and VPC setup.
- Gained hands-on exposure to cloud architecture, security fundamentals, and basic cost-monitoring practices.

Certifications

Microsoft Azure AI Fundamentals Aug 2025

Salesforce AI Associate Feb 2025

TCS iON Career Edge Feb 2025

Achievements

- Built FarmDirect, an end-to-end full-stack marketplace application that streamlines direct interactions between farmers and buyers through a digital platform.
- Achieved academic excellence by consistently ranking among the top-performing students during the 2nd and 3rd years of the B.Tech program and receiving university recognition.
- Actively participated in hackathons, coding competitions, and innovation challenges, demonstrating strong problem-solving, teamwork, and software development skills.
