Career Objective

Motivated Computer Science student specializing in AI and Machine Learning, with hands-on experience in cloud computing, full-stack development, and data analytics. Seeking to leverage technical expertise to build scalable and impactful software solutions.

Education

SR University, Warangal

2023 – 2027

B.Tech in Computer Science and Engineering (AIML)

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: React, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs

Databases: MongoDB, MySQL

Cloud/DevOps: AWS (EC2, S3, IAM, VPC, CloudWatch), Docker, GitHub Actions

Tools: VS Code, NetBeans, Postman

Concepts: Data Structures and Algorithms, OOP, CRUD, Agile

Domains: Machine Learning, Generative AI

Soft skills: focused, Proactive, Time Management, Attention To Detail,

Experience

EduNet Foundation (AICTE & Shell India) — AI & Data Analytics Intern

Oct 2025 – Nov 2025

- Processed 50,000+ records using Pandas and NumPy for machine learning applications.
- Created 10+ visualizations reducing manual reporting time by 30%.
- Ensured ethical AI practices across data workflows.

AWS Cloud Virtual Internship (EduSkills + AICTE) — Cloud Intern

Oct 2024 – Dec 2024

- Deployed infrastructure supporting 2000+ users using AWS services.
- Configured IAM, VPC, and monitoring tools reducing cloud cost by 25%.
- Gained hands-on experience in cloud architecture and deployment.

Generative AI Virtual Internship — AI Intern

Jan 2025 – Mar 2025

- Built 3+ LLM-based prototypes using OpenAI APIs.
- Integrated transformer models improving pipeline efficiency by 20%.
- Developed automation and decision-support systems.

Projects

FarmDirect — Direct Farmer-to-Buyer Marketplace

- Developed a full-stack platform enabling direct trade between farmers and buyers, eliminating intermediaries.
- Implemented authentication, product listing, real-time chat, and order management features.
- Designed role-based access and notification system for farmers, buyers, and admins.

AMR Guard Chain — Digital Farm Management & Food Safety Platform

- Built a system to monitor farm practices and ensure food safety compliance while preventing antimicrobial resistance.
- Enabled real-time tracking of farm activities, chemical usage, and regulatory standards.
- Implemented traceability, alerts, and role-based access for transparency and secure operations.

Online Book Store Management System — Full Stack Application

- Developed an online bookstore with search, authentication, and order processing functionalities.
- Built admin panel for inventory management, pricing, and order tracking.
- Designed responsive UI and scalable backend with secure data handling.

Certifications

- Microsoft Azure AI Fundamentals (Aug 2025)
- TCS iON Career Edge (Feb 2025)
- Salesforce Virtual Internship (Feb 2025)
- Cisco Networking Essentials (Sep 2024)

Accomplishments

- Built multiple full stack applications solving real-world problems.
- Applied AWS cloud concepts for scalable and cost-efficient deployments.
- Developed data-driven solutions for large-scale data analysis.
